The yuan sometimes known as renminbi has been tightly pegged to the U.S. dollar since 1994 (approximately 8.28 yuan to the dollar). During that period of time, Chinaâ∈™s economy has grown dramatically, averaging over 8% per year. If Chinaâ∈™s currency freely floated in the market, as is the							email using our wel	oform

underlying economic s	case with virtually all major world currencies, it would have appreciated substantially reflecting China's underlying economic strength. However, it has remained at the same pegged value, and the result is that many economists estimate that the yuan is now undervalued by between 15 and 40 percent.
